Pilates, Yoga & Floor Barre
Lynn Needle & HeArt in Motion Faculty
These classes incorporate Eastern and Western philosophies to work the body in its entirety. Yoga, (eastern) integrates asanas, proper alignment, mental focus, breathing and flexibility as well as learning to stabilize and strengthen muscle groups. Western disciplines, such as Pilates and floor barre exercises seek to maximize understanding, endurance and toning of the body. Mat work designed by Joseph Pilates at the turn of the century emphasizes principles of opposition, lengthening of muscle groups and isolation of body parts. Classes vary from mat classes to ball class, which includes center floor work on a large Pilates stability ball. Therabands and yoga bricks are used as teaching tools. Mat work is eventually taught at the ballet barre and developed into standing work. Floor barre exercises include simple plies, leg extensions, hip and abdominal isolations as well as a back strengthening series. Classes focus on strengthening the body as an instrument. Please bring a yoga mat and wear comfortable clothing. Some classes may feature guest faculty from HeArt in Motion Studio and NYC.

Estate & Tax Planning
Michael A. Manna
This course is designed to acquaint individuals with the value of a professionally drawn will, the necessity of a financial power of attorney and the key provisions of a living will/medical power of attorney. Seniors are also often totally unaware of taxes that may be due to the state of NJ or the federal government on their death. Most elders believe that estate taxes are being phased out and are of no concern. In many cases this is true - but, few know that New Jersey has an inheritance tax that can be as high as 16% and is NOT being phased out. This tax is imposed on the estates of people who have no spouse or children and leave the money to other family members or friends. The estate tax law now gives most people an opportunity to reduce or eliminate capital gains taxes. Methods to reduce these taxes as well as the pros and cons of gifts and gift taxes will also be discussed. $30 per family

Elder Law
Michael A. Manna
Seniors are often without basic legal documents that they need to control their personal and financial lives as well as their medical care. They are also often totally ignorant of various government programs that are available to pay for their home care, prescription drugs, and nursing home care. This course is designed to acquaint individuals with the value of a professionally drawn will, the necessity of a financial power of attorney and the key provisions of a living will/medical power of attorney. Eligibility for medicare, medicaid and managed care programs will be explored in detail. The drastic changes to medicaid rules (particularly the penalties for making gifts, the new five year look back rule, grandfather provisions) brought about by the Deficit Reduction Act of 2005 will be discussed in detail. New Jersey’s excellent prescription drug program (PAAD) for seniors will also be discussed. $30 per family

Creating Fine Silver Jewelry for Beginners

Terry Kovalcik

This beginner’s workshop will explore the seemingly endless possibilities of creating silver jewelry with Precious Metal Clay. It will introduce you to the different types of PMC (lump, sheet and paste) in an easy step-by-step format. Topics covered will include: working with the clay, creating forms, carving, molding, texturing, firing, oxidizing, and polishing. Participants will explore these techniques with an eye toward finding their own voice and style through a choice of projects - pendants, hollow forms, decorative beads, constructed forms and earrings. PMC is a unique jewelry making material. This user-friendly product is a malleable substance that is composed of fine silver particles in an organic binder. It can be sculpted and manipulated like potter’s clay. After firing in a kiln, all that is left is your unique design in pure (.999) silver. Materials fee* is payable directly to instructor at class.

*Please note: Precious Metal Clay (PMC) is based on the market price of silver which fluctuates daily. Due to the continuing rise in the price of the silver, the price listed here may not accurately reflect the current price of the material. Prices may end up being higher or lower. At the time of this printing, the cost of PMC materials for this class is approximately $92-$100.

Creating Fine Silver Jewelry–Level Two

Terry Kovalcik

This is an intermediate level fine silver jewelry class. The prerequisite for this workshop is attendance at a prior class in silver metal clay jewelry. If you have attended one of Terry’s introduction to silver jewelry classes or a metal clay class with another instructor, this class is for you. We’ll continue to explore the unique qualities of silver metal clay while constructing more complicated three-dimensional, hollow form elements. Learn how to combine your silver jewelry with a splash of color to finish your designs—work with UV resin, polymer clay inlays, glass paints, or Aura 22. Each project will be made more complex by combining many of the techniques learned in prior workshops with an aim to help bring your work to the next level.

*Please note: Precious Metal Clay (PMC) is based on the market price of silver which fluctuates daily. Due to the fluctuating price of the silver, the price listed here may not accurately reflect the current price of the material. Prices may end up being higher or lower. At the time of this printing, the cost of PMC materials for this class is approximately $96-$110. Aura 22 is an optional cost and also fluctuates with market conditions. Besides the step-by-step instruction using every muscle in your body, you will learn how to build bone density and strength by working against gravity to improve tone, balance and endurance. Tyler Ardizzone
Do you have chronic pain? Isn’t it so confusing? Your doctor, physical therapist, and surgeon all seem to be saying different things and nothing is providing long-lasting pain relief. The reason why nothing is working is because chronic pain is a complex issue with many different causes that are unique to the person that is in pain. Two people can have the same pain for the same period of time with the same amount of joint damage, but the same approach will not work for both of them. During this course, we will make the complex topic of pain into a simple and reversible issue. We will do this by understanding the reason why the body creates pain, learning how to relieve your aches and pains, and exploring how you can continue the progress on your own.

Singing Bowls for Healing & Relaxation
Mary Ann Gebhardt & Joan Tarrant
Singing bowls are used in yoga, music therapy, and sound healing. They are also played to signal the beginning and the end of silent meditation. Like a bell, the tone is produced by striking the side of the bowl with a wooden mallet. By running the mallet around the bowl - only with slight pressure - a pure tone will eventually rise. When this happens, the bowl is said to sing. Tibetan singing bowls vibrate and produce a deep relaxation, the singing bowls are also used in combination with other healing practices, such as meditation and deep breathing. This class will be deeply relaxing, starting with gentle yoga stretches, followed by listening to the healing tones of the bowls. More information about the bowls will be discussed. Mary Ann & Joan will have over 50 singing bowls. Bring a yoga mat and a blanket.
